

Vehicles and Transport

Vehicles and transport help people or things move from one place to another.

There are four main types of transport:

air

water

rail

land

Have a think...

What's your favourite type of transport?

Different Types of Vehicles

boat

car

bicycle

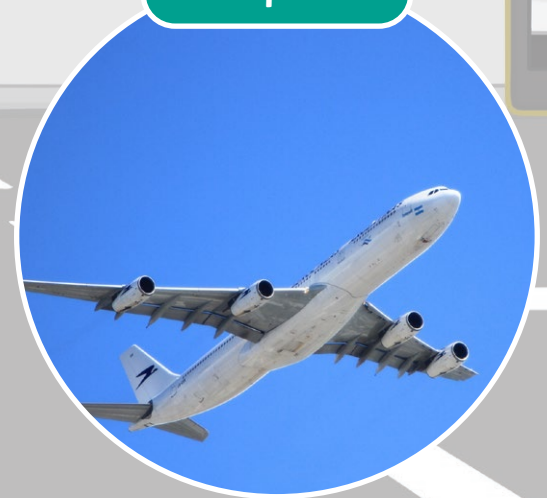

train

bus

aeroplane

Which of these vehicles have you been on?

Cars, Buses and Trains

cars

Cars have lots of parts, such as an outer shell and an **engine**.

buses

A bus is a large vehicle used to carry people.

Do you know what this is?
Have you used one before?

trains

A train has different carriages which are pulled by an engine.

Did you know...?
An engine helps vehicles to move.

Aeroplanes, Boats and Bicycles

bicycles

Bicycles have a frame, two wheels, two pedals, a seat and a metal chain.

boats

Boats travel on water. Large boats are called ships.

I am a **pilot**. I control the aeroplane from my **cockpit**.

aeroplanes

Aeroplanes fly through the sky. They move very fast and can be used to travel long distances.

Weird and Wonderful Transport

beach ambulances

A beach ambulance rescues people who may need help at the seaside.

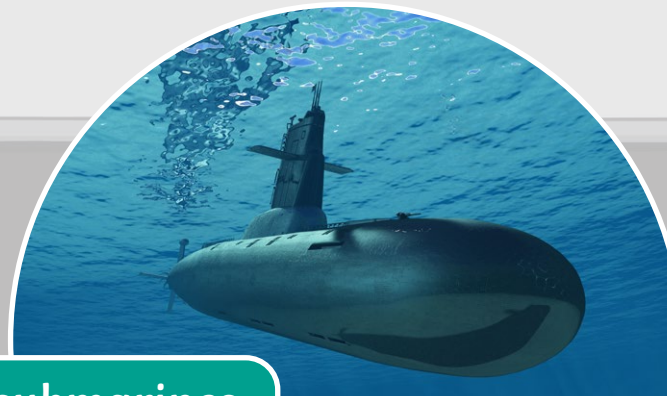

hang gliders

This is a hang glider. A person flies it from underneath.

Did you know...?

A vessel is another word for a boat or ship.

submarines

A submarine is a large **vessel** that goes under water.

Vehicles and Transport Around the World

Look at these amazing methods of transport from around the world! Can you guess where they are used?

cable cars

husky sleds

gondolas
